

MARK C. MESSICS, P.E.

Mark C. Messics has a B.S. in civil engineering and an M.B.A. from Lehigh University. He is a professional engineer with 22 years of construction and project development/management experience. He has been employed by Waste Management, Inc. (WM) for 15 years, during which time he has managed an assortment of projects at the company's landfills, hauling companies, and transfer stations in the Mid-Atlantic area.

Mark is currently WM's Eastern Area Director of LFG Energy. He is responsible for developing new landfill gas to energy (LFGTE) projects, as well as maximizing the potential of the company's existing LFGTE projects in a fifteen-state area that includes 70 landfills. Mark has developed five LFG-to-electric plants with a total output of 36 MW, and two medium-BTU direct gas sale projects that are presently flowing a total of 13,000 scfm of LFG. He has negotiated gas sale agreements with third party developers who are utilizing an additional 18,000 scfm from 12 landfills. Mark developed the LFGTE project at Grand Central Landfill in Pennsylvania that won LMOP's 2000 Project of the Year award.

Mark is currently developing LFGTE projects at 20 WM landfills. The new projects scheduled to go on-line within the next two years are projected to beneficially utilize an additional 35,000 scfm of LFG.
